1. Executive Summary:

- Generated **\$817,860.05** in total revenue.
 - Large pizzas** contributed **45.89%** of revenue, making them the most profitable size.
 - Classic** was the highest revenue-generating category (**26.91%**).
 - The Thai Chicken Pizza (Large)** was the top-performing product by revenue.
 - The Classic Deluxe Pizza** recorded the highest sales volume (**2,453 pizzas sold**).
 - Weekdays** accounted for **72.83%** of all orders, with **12 PM** identified as the peak ordering hour.
 - The analysis covered **21,350 customer orders**, **48,620 order line items**, **96 pizza SKUs**, and **32 pizza varieties**.
 - Opportunities exist to improve profitability by promoting high-performing products, optimizing oversized pizza offerings, strengthening lunchtime operations, and reducing procurement costs through targeted supplier negotiations.
-

2. Key Findings Summary:

Area	Key Finding
Revenue Performance	Total revenue generated was \$817860 based on completed orders.
Best Performing Pizza	The highest revenue-generating pizza was The Thai Chicken Pizza (L) .
Top Category	Classic contributed the highest revenue share.
Popular Size	Large pizzas generated the highest revenue contribution.
Sales Volume	The top-selling pizza by quantity was The Big Meat Pizza (S) . The Classic Deluxe Pizza
Order Behaviour	Average order size was 2 pizzas per order .
Revenue per Order	Average revenue per order was \$38.31 .
Peak Sales Period	Revenue was highest during [Month/Week/Time Period] . Wednesday, 12pm, July

Ingredient Demand	Frequently used ingredients included Garlic, Tomatoes, Red Onions, Red Peppers, Mozzarella Cheese etc.
Lowest Performer	The Greek XXL Pizza generated the lowest revenue and requires review.

3. Sales Performance Summary:

The company generated a total revenue of \$817,860.05, demonstrating strong overall business performance across multiple pizza categories and sizes.

Key revenue insights include:

- Large pizzas generated \$375,318.70 (45.89%), making them the highest revenue contributor.
- Medium pizzas contributed \$249,382.25 (30.49%).
- Small pizzas generated \$178,076.50 (21.77%).
- XL and XXL pizzas together contributed less than 2% of total revenue, indicating very limited customer demand.

Revenue by category remained relatively balanced:

Category	Revenue Contribution
Classic	26.91%
Supreme	25.46%
Chicken	23.96%
Veggie	23.68%

The **Thai Chicken Pizza (Large)** generated the highest revenue among all products, highlighting strong customer preference for premium, large-sized pizzas.

Business Impact:

The company's revenue is primarily driven by Large pizzas and a small group of high-performing menu items. Marketing investments should focus on these products to maximize revenue growth while maintaining a balanced product portfolio.

4.Customer Behaviour Analysis:

Customer purchasing behaviour demonstrates consistent ordering patterns throughout the week.

Key observations include:

- **Weekdays accounted for 15,551 orders (72.83%),** compared with **5,799 weekend orders (27.17%).**
- **12 PM** was the busiest ordering hour, indicating strong lunchtime demand.
- **Large pizzas** were the most preferred size, with **18,956 pizzas sold.**
- **The Classic Deluxe Pizza** recorded the highest sales volume with **2,453 units sold.**
- Frequently purchased pizza combinations indicate opportunities for bundled promotions and meal deals.

Business Impact:

Customer demand is concentrated during weekday lunch periods, making these hours critical for staffing, inventory availability, and promotional activities. Understanding these purchasing patterns enables more targeted marketing campaigns and improved customer experience.

5. Category & Size Analysis:

Category Analysis

- The **Classic** category generated the highest revenue, contributing **26.91% (\$220,053.10)** of total sales, making it the strongest-performing product category.
- **Supreme (25.46%), Chicken (23.96%),** and **Veggie (23.68%)** followed closely, indicating a well-balanced revenue distribution across the menu.
- The difference between the highest and lowest revenue-generating categories is only **3.23 percentage points**, suggesting that customer demand is diversified rather than concentrated in a single category.

Business Insight

A balanced category distribution reduces business risk and provides flexibility for future product innovation. The company should continue investing in all categories while strengthening the Classic category through seasonal promotions and premium product offerings.

Size Analysis

- **Large pizzas** generated **45.89% (\$375,318.70)** of total revenue, making them the company's most profitable product size.
- **Medium pizzas** contributed **30.49%**, followed by **Small pizzas (21.77%)**.
- **XL** and **XXL** pizzas together generated only **1.84%** of total revenue, indicating minimal customer demand.

Business Insight

Customer preference is clearly skewed toward Large pizzas. Promotional campaigns, family meal bundles, and combo offers should focus on Large pizzas to maximize revenue. The company should also evaluate the commercial viability of XL and XXL sizes due to their limited contribution.

6. Product Performance:

- **The Thai Chicken Pizza (Large)** emerged as the highest revenue-generating pizza, contributing **\$29,257.50**.
- Other top-performing pizzas include:
 - The Five Cheese Pizza (Large)
 - The Four Cheese Pizza (Large)
 - The Spicy Italian Pizza (Large)
 - The Big Meat Pizza (Small)

Business Insight:

Premium and large-sized pizzas consistently generate higher revenue, making them ideal candidates for promotional campaigns and featured menu placement.

7. Revenue Trend Analysis:

Key Findings

- Revenue remained relatively stable throughout the year, with noticeable peaks during high-demand periods.
- Weekly and monthly sales trends indicate consistent customer demand, demonstrating stable business performance.
- Peak revenue generation aligns with weekday lunch and evening ordering periods, highlighting predictable purchasing behavior.

- Revenue is primarily driven by a combination of high-selling pizza varieties and Large-sized pizzas.

Business Insight

Consistent revenue trends enable more accurate sales forecasting, inventory planning, and workforce scheduling. Historical demand patterns can be leveraged to optimize procurement, staffing, and promotional calendars.

8. Pizza Performance Analysis:

Top Performers

- **The Thai Chicken Pizza (Large)** generated the highest revenue, making it the company's flagship product.
- **The Classic Deluxe Pizza** achieved the highest sales volume with **2,453 pizzas sold**.
- Large-sized premium pizzas consistently outperformed other menu items in both revenue and customer demand.

Underperformers

- Several pizzas generated comparatively low revenue and sales volume, indicating opportunities for menu optimization.
- XL and XXL product variants consistently demonstrated low customer demand.

Business Insight

The company's revenue is concentrated among a limited number of high-performing products. Marketing investments should prioritize these products, while low-performing pizzas should be reviewed for pricing, recipe improvements, bundling opportunities, or potential discontinuation.

9. Ingredient & Inventory Insights:

Key Findings

- Ingredient consumption is concentrated among the highest-selling pizzas.
- Monthly ingredient demand closely follows historical sales patterns, enabling predictable inventory planning.
- High-volume ingredients account for the majority of procurement requirements and have the greatest impact on operating costs.

- Large pizzas consume a significant proportion of ingredients due to their strong sales performance.

Business Insight

Implementing demand-based inventory forecasting will reduce stock shortages, minimize food waste, and improve procurement efficiency. Supplier negotiations should focus on the most frequently used ingredients to support the company's cost-reduction objectives.

10. Operational Insights

Key Findings

- High-selling pizzas drive the majority of ingredient consumption.
- Monthly sales trends support accurate inventory planning.
- Peak ordering hours require additional staffing.
- High-demand ingredients dominate procurement needs.

Business Impact

- Improve inventory forecasting to reduce waste and stock shortages.
 - Negotiate better pricing for high-volume ingredients.
 - Optimize staffing during peak hours to enhance service efficiency.
 - Align inventory planning with historical demand trends.
-

11. Strategic Business Evaluation:

Key Findings

- Large pizzas are the highest-performing size in both revenue and sales.
- The **Classic** category contributes the highest share of total revenue (**26.91%**).
- Low-performing pizzas present opportunities for menu optimization.
- High-demand ingredients should be prioritized for supplier negotiations.

Business Impact

- Focus marketing on top-performing pizzas to maximize revenue.

- Optimize or discontinue consistently low-performing menu items.
 - Negotiate better pricing for high-volume ingredients to reduce procurement costs.
 - Invest in data-driven product and pricing strategies to improve long-term profitability.
-

12. Strategic Business Actions:

Short-Term (0–3 Months)

Revenue Growth

- Promote the **top three revenue-generating pizzas** through digital campaigns and featured menu placement.
- Launch **Large pizza combo offers** and family meal deals to capitalize on the size contributing **45.89%** of total revenue.

Operations

- Increase staffing during **12 PM lunch hours** and other peak periods.
- Maintain adequate inventory levels for high-demand ingredients.

Marketing

- Promote best-selling pizza combinations to increase average order value.
-

Medium-Term (3–6 Months)

Menu Optimization

- Review the performance of underperforming pizzas and assess pricing, recipe, or promotional improvements.
- Reposition or bundle low-performing products before considering discontinuation.

Inventory Management

- Implement monthly ingredient demand forecasting.
- Introduce automated reorder planning for frequently used ingredients.

Customer Engagement

- Develop personalized promotional campaigns based on customer purchasing patterns.
-

Long-Term (6–12 Months)

Business Expansion

- Introduce new pizza varieties inspired by top-selling products and customer preferences.
- Evaluate the feasibility of expanding the vegetarian menu if demand continues to grow.

Procurement Strategy

- Establish long-term contracts with suppliers for high-volume ingredients to reduce procurement costs.

Data-Driven Decision Making

- Develop predictive sales forecasting models to support production planning, inventory optimization, and demand forecasting.
- Continuously monitor product performance using business intelligence dashboards to support strategic decision-making.

13. Actionable Recommendations:

Business Opportunity	Recommendation	Expected Business Impact
Large pizzas generate 45.89% of revenue	Prioritize marketing campaigns and family meal bundles centered on Large pizzas.	Increase average order value and overall revenue.
Classic category contributes 26.91% of total revenue	Continue investing in Classic pizzas while maintaining product quality and promotional visibility.	Sustain market leadership and customer loyalty.
Thai Chicken Pizza is the highest revenue generator	Feature this pizza in digital campaigns, combo offers, and seasonal promotions.	Maximize revenue from proven high-performing products.
XL and XXL pizzas contribute only 1.84% combined	Reassess pricing, demand, or menu positioning for oversized pizzas.	Reduce inventory complexity and improve menu profitability.
Weekdays account for 72.83% of all orders	Allocate additional staff and inventory during weekday lunch hours.	Improve service speed and customer satisfaction.

Peak demand occurs at 12 PM	Increase kitchen capacity and delivery resources during lunchtime.	Reduce order processing time and improve operational efficiency.
Large pizzas are the most purchased size (18,956 units)	Introduce value-based combo meals and family offers focused on Large pizzas.	Increase customer spending per transaction.
Demand is evenly distributed across categories	Maintain a balanced marketing strategy while testing targeted campaigns for lower-performing categories.	Support sustainable revenue growth without over-reliance on one category.
High-volume ingredients drive production	Negotiate supplier contracts for the most frequently used ingredients and purchase them in bulk.	Reduce procurement costs and improve supply chain efficiency.
Sales patterns are predictable	Implement demand-based inventory forecasting using historical sales trends.	Minimize waste, optimize stock levels, and improve operational planning.

14. Conclusion:

- The SQL analysis provided comprehensive insights into **sales performance, customer behavior, operational efficiency, and strategic growth opportunities.**
- Pizza Company generated **\$817,860.05** in total revenue, with **Large pizzas contributing 45.89%** of total sales, making them the primary revenue driver.
- The **Classic** category generated the highest revenue contribution (**26.91%**), while **The Thai Chicken Pizza (Large)** emerged as the top-performing product by revenue.
- **Weekdays accounted for 72.83%** of total orders, with **12 PM** identified as the peak ordering hour, indicating the need for optimized staffing and inventory during high-demand periods.
- Sales and demand patterns support **accurate inventory forecasting**, enabling better stock management and reduced food waste.
- Negotiating supplier contracts for **high-demand ingredients** presents a significant opportunity to lower procurement costs and improve operational efficiency.
- Marketing efforts should prioritize **high-performing pizzas and Large-sized products**, while underperforming menu items should be reviewed for optimization or discontinuation.

- Implementing these recommendations will help **increase revenue, optimize operations, reduce costs, enhance customer satisfaction, and support long-term, data-driven business growth.**
-
